

THERMAL SPRAYING DEVICE

Abstract

Thermal spraying method and device that includes a means (1,2) for generating a flame and a means (3) for injecting a powder into the flame. The flame-generating means (1,2) includes an end piece (1) out of which the flame is directed towards a substrate subjected to spraying. The powder-injection means (3) includes a frame element (6) that is adapted to be attached to the end piece (1) and to project in the flame ejection direction from the end piece (1).
